SUBJECT INDEX TO VOLUME 40 (1999)

Nervous system incl. skull

Correlation of angiography and MR imaging in cerebral vasculitis 83
Evaluation of the pituitary gland in idiopathic hypogonadotropic hypogonadism 88
MR myelography of sacral meningeal cysts 95
MR imaging with gadolinium in patients with and without post-lumbar puncture headache 135
High intensity signal of the posterior pituitary. A study with horizontal direction of frequency-encoding and fat suppression MR techniques 142
Radiological diagnosis of acute stroke. Comparison of conventional MR imaging, echo-planar diffusion-weighted imaging, and spin-echo diffusion-weighted imaging 255
Triggering in quantitative diffusion imaging with single-shot EPI 263
Review article. Interventional neuroradiology 344
MR imaging of experimentally induced intracranial hemorrhage in rabbits during the first 6 hours . . . 360
Perfusion CT of the brain in the assessment of flow alterations during brachytherapy of meningioma . . 469
CT-guided fine-needle aspiration biopsy of spinal lesions 474
Optimising imaging parameters for *post mortem* MR imaging of the human brain 593
Postoperative nerve root displacement and scar tissue. A prospective cohort study with contrast-enhanced MR imaging one year after microdiscectomy 598

Ear, nose, throat and eye

Thymus size in preterm infants evaluated by ultrasound. A preliminary report 37
CT and MR imaging of the paranasal sinuses in cystic fibrosis. Correlation with microbiological and histopathologic results 154
MR imaging of squamous cell carcinoma of the floor of the mouth. Appearance of the sublingual and submandibular glands 276
Hypoplasia of the sphenoid sinuses as a diagnostic tool in cystic fibrosis 479

Musculoskeletal radiology

Plain radiography of the lumbosacral spine. An audit of referrals from general practioners 52
MR evaluation of the articular cartilage of the femoral head during head traction. Correlation with resected femoral head 60
MR imaging of lipoma and liposarcoma 64
MR imaging in amyopathic dermatomyositis 69
Muscle metabolism of professional athletes using ^{31}P-spectroscopy 73
Time dependence of iopamidol and iodixanol in arthrography of the knee 107
Kinematic MR imaging in surgical management of cervical disc disease, spondylosis and spondylotic myelopathy 146
Epitheloid hemangioendothelioma with solitary bone location associated to multiple lung and liver lesions. A case report 217
Effect of an internal carotid stenosis on orbital blood velocity 270
Clinical impact of MR arthrography of the shoulder 296
Ligaments and tendons of the ankle. Evaluation with low-field (0.2 T) MR imaging 303
Sympathotropic drugs and the distribution of ^{99m}Tc-hydroxymethylene diphosphonate. Experimental studies in the mouse 309
Wrist and finger joint MR imaging in rheumatoid arthritis 400
MR imaging in tibial shaft fractures. A potential method for early visualization of delayed union . . 410
MR imaging in biofix-osteosynthesis 415
Radiographic absorptiometry of the phalanges as a screening instrument to detect osteoporosis of the hip 418
110 subfascial lipomatous tumors. MR and CT findings versus histopathological diagnosis and cytogenetic analysis 603
MR assessment of movement and morphologic change in the menisci during knee flexion 610
MR imaging in suspected acute trauma of wrist bones 615
Reliability of ultrasonography in the follow-up of hip dysplasia in children above 2 years of age 619
Ultrasonographic localization of a displaced screw in the carpal canal. A case report 625

Breast

Differentiating benign and malignant breast lesions with T2*-weighted first pass perfusion imaging . . . 45
Diagnostic value of ultrasonography in patients with palpable mammographically noncalcified breast tumors 163
Variability in the interpretation of ultrasonography in patients with palpable noncalcified breast tumors . 169
Comparison of planar and SPECT scintimammography with ^{99m}Tc-sestamibi in the diagnosis of breast carcinoma 176
Ultrasonographic evaluation of invasive lobular carcinoma 369
Ultrasonography of malignant breast neoplasms. Analysis of carcinomas missed as tumor 376
Contribution of ultrasonography and fine-needle aspiration cytology to the differential diagnosis of palpable solid breast lesions 383
Automated stereotactic core needle biopsy of microcalcifications with correlation to surgical biopsy 390

Sensitivity and specificity of planar scintimammography with ^{99m}Tc-sestamibi 394
The additional value of US to mammography in the diagnosis of breast cancer. A prospective study . . . 486
Evaluation of planar scintimammography with ^{99m}Tc-MIBI in the detection of axillary lymph node metastases of breast carcinoma 491
Characterization of breast masses by dynamic enhanced MR imaging. A logistic regression analysis 585

Cardiovascular system

Review article. Cardiac MR imaging 1
Morphological abnormalities revealed after successful intra-arterial thrombolysis of infra-inguinal native arteries and bypasses 23
Central assessment of bilateral phlebograms in a major multicentre thromboprophylactic trial. Reasons for inadequate results 29
Correlation of angiography and MR imaging in cerebral vasculitis 83
Internal mammary artery embolization for hemoptysis 187
Saline-jet aspiration thrombectomy catheter. Clinical results in patients with venous thrombosis 207
Effect of an internal carotid stenosis on orbital blood velocity 270
NC100150-enhanced 3D-SPGR MR angiography of the common carotid artery in a pig vascular stenosis model. Quantification of stenosis and dose optimization 282
Comparison of iodixanol 270 with iohexol 300 in infrapopliteal arteriography. Digital densitometric analysis of angiographic opacification 291
Timing adjustment in gadolinium MR angiography by raw data recombination. Technical note 462
Placement of a Spring filter during interventional treatment of deep venous thrombosis to reduce the risk of pulmonary embolism 545
Biventricular diastolic cardiac function assessed by MR flow imaging using a single angulation 563
Motion artifacts in cardiac CT. The Novacor left ventricular assist device and its implications for clinical imaging 569
Bronchopulmonary arterial anastomosis at the precapillary level in human lung. Visualization using CT angiography compared with microangiography of autopsied lung 578
Transcatheter embolization of a superior mesenteric artery pseudoaneurysm. A case report 649

Mediastinum and respiratory system

Thymus size in preterm infants evaluated by ultrasound. A preliminary report 37
Thymus size in infants from birth until 24 months of age evaluated by ultrasound. A longitudinal prediction model for the thymic index 41
Thoracic CT findings in long-term hemodialysis patients 181
Internal mammary artery embolization for hemoptysis 187
Epitheloid hemangioendothelioma with solitary bone location associated to multiple lung and liver lesions. A case report 217
Diaphragmatic haemangioma. A case report 329
CT measurement of lung density 333
HRCT in miliary lung disease 451
New classification of small pulmonary nodules by margin characteristics on high-resolution CT 496
Detection of small peripheral lung cancer by digital chest radiography. Performance of unprocessed versus unsharp mask-processed images 505
CT findings in pulmonary hydatid disease 510
Placement of a Spring filter during interventional treatment of deep venous thrombosis to reduce the risk of pulmonary embolism 545

Digestive tract

Review article. Endosonography in gastrointestinal diseases 119
Comparative evaluation of plain films, ultrasound and CT in the diagnosis of intestinal obstruction 422
Ferric ammonium citrate as a positive bowel contrast agent for MR imaging of the upper abdomen. Safety and diagnostic efficay 429
Radiological demonstration of gastroesophageal reflux. Diagnostic value of barium and bread studies compared with 24-hour pH monitoring 652

Liver, biliary tract

Epitheloid hemangioendothelioma with solitary bone location associated to multiple lung and liver lesions. A case report 217
Concentration of ^{123}I-metaiodobenzyl-guanidine in left and right liver lobes. Findings indicate regional differences in function in the normal liver 224
MR imaging of the liver using an ultrafast 3D multishot EPI sequence. Comparison with four other T1-weighted sequences 322
Hepatic alveolar echinococcosis. A case report 326
Ultrasound-guided fine needle aspiration biopsy of gall bladder malignancies 436
The incidence of gallbladder stones and gallbladder function in beta-thalassemic children 440
CT of liver cysts in patients with autosomal dominant polycystic kidney disease 444
Small hepatocellular carcinoma supplied by the right renal capsular artery. A case report 449
Long-term follow-up in patients with malignant biliary obstruction after percutaneous placement of uncovered Wallstent endoprostheses 528

SPIO-MR imaging versus double-phase spiral CT in detecting malignant lesions of the liver 628
Single-session alcohol sclerotherapy in symptomatic benign hepatic cysts. Long-term results 636
Power Doppler sonography of hepatocellular carcinoma treated by transcatheter arterial chemoembolization. Assessment of therapeutic effect 639

Spleen, pancreas

Accessory wandering spleen associated with short pancreas. A pediatric case report 104
Localization of pancreatic insulinomas with MR imaging at 0.5 T 644

Abdominal radiology

MR findings in primary retroperitoneal schwannoma 78
Comparative evaluation of plain films, ultrasound and CT in the diagnosis of intestinal obstruction 422
Ferric ammonium citrate as a positive bowel contrast agent for MR imaging of the upper abdomen. Safety and diagnostic efficacy 429
Prospective randomized study for an injection protocol for intravenous contrast media in abdominal and pelvic helical CT 515

Urogenital system

MR pyelography and conventional MR imaging in urinary tract obstruction 198
Renal diuretic duplex Doppler sonography in childhood hydronephrosis 203
Clearance of iopromide during haemodialysis with high- and low-flux membranes 220
Review article. MR imaging of invasive carcinoma of the uterine cervix 236
Renal duplex Doppler ultrasonography as a predictor of preclinical diabetic nephropathy in children . . . 246
Gadolinium-enhanced MR imaging of normal renal transplants. An evaluation of a T1-weighted dynamic echo-planar sequence 250
Renal masses – evaluation by amplitude coded colour Doppler sonography and multiphasic contrast-enhanced CT 457
Prospective randomized study for an injection protocol for intravenous contrast media in abdominal and pelvic helical CT 515
Hypoperfusion in the renal outer medulla after injection of contrast media in rats 521
Imaging of abdominal neuroblastoma in children . . . 534
RARE-MR-urography – a new diagnostic method in autosomal recessive polycystic kidney disease 543
Predicting the effect of gonadotropin-releasing hormone (GnRH) analogue treatment on uterine leiomyomas based on MR imaging 656

Endocrine system

Transcatheter adrenal arterial embolization of cortisol-producing tumors. Two cases of Cushing's syndrome 100

Lymphatic system

CT in malignancy grading and prognostic prediction of non-Hodgkin's lymphoma 191

Pediatric radiology

Thymus size in preterm infants evaluated by ultrasound. A preliminary report 37
Thymus size in infants from birth until 24 months of age evaluated by ultrasound. A longitudinal prediction model for the thymic index 41
Accessory wandering spleen associated with short pancreas. A pediatric case report 104
Renal diuretic duplex Doppler sonography in childhood hydronephrosis 203
Renal duplex Doppler ultrasonography as a predictor of preclinical diabetic nephropathy in children . . . 246
Diaphragmatic haemangioma. A case report 329
The incidence of gallbladder stones and gallbladder function in beta-thalassemic children 440
Imaging of abdominal neuroblastoma in children . . . 534
RARE-MR-urography – a new diagnostic method in autosomal recessive polycystic kidney disease 543
Reliability of ultrasonography in the follow-up of hip dysplasia in children above 2 years of age 619

Ultrasonography

Thymus size in preterm infants evaluated by ultrasound. A preliminary report 37
Thymus size in infants from birth until 24 months of age evaluated by ultrasound. A longitudinal prediction model for the thymic index 41
Accessory wandering spleen associated with short pancreas. A pediatric case report 104
Review article. Endosonography in gastrointestinal diseases 119
Diagnostic value of ultrasonography in patients with palpable mammographically noncalcified breast tumors 163
Variability in the interpretation of ultrasonography in patients with palpable noncalcified breast tumors . 169
Renal diuretic duplex Doppler sonography in childhood hydronephrosis 203
Renal duplex Doppler ultrasonography as a predictor of preclinical diabetic nephropathy in children . . . 246
Hepatic alveolar echinococcosis. A case report 326
The tip of the nedle – a trick of the trade 338
Ultrasonographic evaluation of invasive lobular carcinoma 369

Ultrasonography of malignant breast neoplasms. Analysis of carcinomas missed as tumor 376
Contribution of ultrasonography and fine-needle aspiration cytology to the differential diagnosis of palpable solid breast lesions 383
Comparative evaluation of plain films, ultrasound and CT in the diagnosis of intestinal obstruction 422
Ultrasound-guided fine needle aspiration biopsy of gall bladder malignancies 436
The incidence of gallbladder stones and gallbladder function in beta-thalassemic children 440
Renal masses – evaluation by amplitude coded colour Doppler sonography and multiphasic contrast-enhanced CT 457
The additional value of US to mammography in the diagnosis of breast cancer. A prospective study . . . 486
Imaging of abdominal neuroblastoma in children . . . 534
Reliability of ultrasonography in the follow-up of hip dysplasia in children above 2 years of age 619
Ultrasonographic localization of a displaced screw in the carpal canal. A case report 625
Power Doppler sonography of hepatocellular carcinoma treated by transcatheter arterial chemoembolization. Assessment of therapeutic effect 639

CT

Accessory wandering spleen associated with short pancreas. A pediatric case report 104
CT and MR imaging of the paranasal sinuses in cystic fibrosis. Correlation with microbiological and histopathologic results 154
Thoracic CT findings in long-term hemodialysis patients 181
CT in malignancy grading and prognostic prediction of non-Hodgkin's lymphoma 191
Determination of tissue volumes. A comparison between CT and MR imaging 314
Hepatic alveolar echinococcosis. A case report 326
Diaphragmatic haemangioma. A case report 329
CT measurement of lung density 333
Comparative evaluation of plain films, ultrasound and CT in the diagnosis of intestinal obstruction 422
CT of liver cysts in patients with autosomal dominant polycystic kidney disease 444
Small hepatocellular carcinoma supplied by the right renal capsular artery. A case report 449
HRCT in miliary lung disease 451
Renal masses – evaluation by amplitude coded colour Doppler sonography and multiphasic contrast-enhanced CT 457
Perfusion CT of the brain in the assessment of flow alterations during brachytherapy of meningioma . . 469
CT-guided fine-needle aspiration biopsy of spinal lesions 474
Hypoplasia of the sphenoid sinuses as a diagnostic tool in cystic fibrosis 479
New classification of small pulmonary nodules by margin characteristics on high-resolution CT 496
CT findings in pulmonary hydatid disease 510
Prospective randomized study for an injection protocol for intravenous contrast media in abdominal and pelvic helical CT 515
Imaging of abdominal neuroblastoma in children . . . 534
Impact of CT in patients with sepsis of unknown origin 552
Motion artifacts in cardiac CT. The Novacor left ventricular assist device and its implications for clinical imaging 569
Bronchopulmonary arterial anastomosis at the precapillary level in human lung. Visualization using CT angiography compared with microangiography of autopsied lung 578
110 subfascial lipomatous tumors. MR and CT findings versus histopathological diagnosis and cytogenetic analysis 603
SPIO-MR imaging versus double-phase spiral CT in detecting malignant lesions of the liver 628

MR imaging and spectroscopy

Differentiating benign and malignant breast lesions with T2*-weighted first pass perfusion imaging . . . 45
Respiratory monitoring during MR imaging. The clinical value of a new fibre-optical monitor 33
Review article. Cardiac MR imaging 1
MR evaluation of the articular cartilage of the femoral head during head traction. Correlation with resected femoral head 60
MR imaging of lipoma and liposarcoma 64
MR imaging in amyopathic dermatomyositis 69
Muscle metabolism of professional athletes using ^{31}P-spectroscopy 73
MR findings in primary retroperitoneal schwannoma 78
Correlation of angiography and MR imaging in cerebral vasculitis 83
Evaluation of the pituitary gland in idiopathic hypogonadotropic hypogonadism 88
MR myelography of sacral meningeal cysts 95
MR imaging with gadolinium in patients with and without post-lumbar puncture headache 135
High intensity signal of the posterior pituitary. A study with horizontal direction of frequency-encoding and fat suppression MR techniques 142
Kinematic MR imaging in surgical management of cervical disc disease, spondylosis and spondylotic myelopathy 146
CT and MR imaging of the paranasal sinuses in cystic fibrosis. Correlation with microbiological and histopathologic results 154
MR pyelography and conventional MR imaging in urinary tract obstruction 198
Review article. MR imaging of invasive carcinoma of the uterine cervix 236

Gadolinium-enhanced MR imaging of normal renal transplants. An evaluation of a T1-weighted dynamic echo-planar sequence 250
Radiological diagnosis of acute stroke. Comparison of conventional MR imaging, echo-planar diffusion-weighted imaging, and spin-echo diffusion-weighted imaging 255
Triggering in quantitative diffusion imaging with single-shot EPI 263
MR imaging of squamous cell carcinoma of the floor of the mouth. Appearance of the sublingual and submandibular glands 276
NC100150-enhanced 3D-SPGR MR angiography of the common carotid artery in a pig vascular stenosis model. Quantification of stenosis and dose optimization 282
Clinical impact of MR arthrography of the shoulder 296
Ligaments and tendons of the ankle. Evaluation with low-field (0.2 T) MR imaging 303
Determination of tissue volumes. A comparison between CT and MR imaging 314
MR imaging of the liver using an ultrafast 3D multishot EPI sequence. Comparison with four other T1-weighted sequences 322
Diaphragmatic haemangioma. A case report 329
MR imaging of experimentally induced intracranial hemorrhage in rabbits during the first 6 hours . . . 360
Wrist and finger joint MR imaging in rheumatoid arthritis 400
MR imaging in tibial shaft fractures. A potential method for early visualization of delayed union . . 410
MR imaging in biofix-osteosynthesis 415
Ferric ammonium citrate as a positive bowel contrast agent for MR imaging of the upper abdomen. Safety and diagnostic efficay 429
Timing adjustment in gadolinium MR angiography by raw data recombination. Technical note 462
Imaging of abdominal neuroblastoma in children . . . 534
RARE-MR-urography – a new diagnostic method in autosomal recessive polycystic kidney disease 543
Biventricular diastolic cardiac function assessed by MR flow imaging using a single angulation 563
Characterization of breast masses by dynamic enhanced MR imaging. A logistic regression analysis 585
Optimising imaging parameters for *post mortem* MR imaging of the human brain 593
Postoperative nerve root displacement and scar tissue. A prospective cohort study with contrast-enhanced MR imaging one year after microdiscectomy 598
110 subfascial lipomatous tumors. MR and CT findings versus histopathological diagnosis and cytogenetic analysis 603
MR assessment of movement and morphologic change in the menisci during knee flexion 610
MR imaging in suspected acute trauma of wrist bones 615
SPIO-MR imaging versus double-phase spiral CT in detecting malignant lesions of the liver 628
Localization of pancreatic insulinomas with MR imaging at 0.5 T 644
Predicting the effect of gonadotropin-releasing hormone (GnRH) analogue treatment on uterine leiomyomas based on MR imaging 656

Nuclear radiology

Variability in the interpretation of ultrasonography in patients with palpable noncalcified breast tumors . 169
Concentration of ^{123}I-metaiodobenzyl-guanidine in left and right liver lobes. Findings indicate regional differences in function in the normal liver 224
Sympathotropic drugs and the distribution of ^{99m}Tc-hydroxymethylene diphosphonate. Experimental studies in the mouse 309
Sensitivity and specificity of planar scintimammography with ^{99m}Tc-sestamibi 394
Evaluation of planar scintimammography with ^{99m}Tc-MIBI in the detection of axillary lymph node metastases of breast carcinoma 491

Interventional radiology

Morphological abnormalities revealed after successful intra-arterial thrombolysis of infra-inguinal native arteries and bypasses 23
Transcatheter adrenal arterial embolization of cortisol-producing tumors. Two cases of Cushing's syndrome 100
Internal mammary artery embolization for hemoptysis 187
Review article. Interventional neuroradiology 344
Contribution of ultrasonography and fine-needle aspiration cytology to the differential diagnosis of palpable solid breast lesions 383
Automated stereotactic core needle biopsy of microcalcifications with correlation to surgical biopsy 390
Ultrasound-guided fine needle aspiration biopsy of gall bladder malignancies 436
CT-guided fine-needle aspiration biopsy of spinal lesions 474
Long-term follow-up in patients with malignant biliary obstruction after percutaneous placement of uncovered Wallstent endoprostheses 528
Imaging of abdominal neuroblastoma in children . . . 534
Placement of a Spring filter during interventional treatment of deep venous thrombosis to reduce the risk of pulmonary embolism 545
Single-session alcohol sclerotherapy in symptomatic benign hepatic cysts. Long-term results 636
Power Doppler sonography of hepatocellular carcinoma treated by transcatheter arterial chemoembolization. Assessment of therapeutic effect 639
Transcatheter embolization of a superior mesenteric artery pseudoaneurysm. A case report 649

Experimental radiology

Saline-jet aspiration thrombectomy catheter. Clinical results in patients with venous thrombosis 207
Sympathotropic drugs and the distribution of ^{99m}Tc-hydroxymethylene diphosphonate. Experimental studies in the mouse 309
MR imaging of experimentally induced intracranial hemorrhage in rabbits during the first 6 hours . . . 360
Hypoperfusion in the renal outer medulla after injection of contrast media in rats 521

Contrast media and other drugs

Time dependence of iopamidol and iodixanol in arthrography of the knee 107
Effects of iodixanol on renal function immediately after abdominal angiography. Clinical comparison with iomeprol and ioxaglate 111
MR imaging with gadolinium in patients with and without post-lumbar puncture headache 135
Clearance of iopromide during haemodialysis with high- and low-flux membranes 220
Gadolinium-enhanced MR imaging of normal renal transplants. An evaluation of a T1-weighted dynamic echo-planar sequence 250
NC100150-enhanced 3D-SPGR MR angiography of the common carotid artery in a pig vascular stenosis model. Quantification of stenosis and dose optimization 282
Comparison of iodixanol 270 with iohexol 300 in infrapopliteal arteriography. Digital densitometric analysis of angiographic opacification 291
Ferric ammonium citrate as a positive bowel contrast agent for MR imaging of the upper abdomen. Safety and diagnostic efficay 429
Timing adjustment in gadolinium MR angiography by raw data recombination. Technical note 462
Hypoperfusion in the renal outer medulla after injection of contrast media in rats 521
SPIO-MR imaging versus double-phase spiral CT in detecting malignant lesions of the liver 628

Physics and technique

Respiratory monitoring during MR imaging. The clinical value of a new fibre-optical monitor 33
A method to evaluate the performance of X-ray imaging scintillators by means of the brightness-sharpness index (BSI) 211
The tip of the nedle – a trick of the trade 338
Radiographic absorptiometry of the phalanges as a screening instrument to detect osteoporosis of the hip 418
Timing adjustment in gadolinium MR angiography by raw data recombination. Technical note 462
Detection of small peripheral lung cancer by digital chest radiography. Performance of unprocessed versus unsharp mask-processed images 505

Research and methodology

Biventricular diastolic cardiac function assessed by MR flow imaging using a single angulation 563
Optimising imaging parameters for *post mortem* MR imaging of the human brain 593
Radiological demonstration of gastroesophageal reflux. Diagnostic value of barium and bread studies compared with 24-hour pH monitoring 652

Miscellaneous

Determination of tissue volumes. A comparison between CT and MR imaging 314
Impact of CT in patients with sepsis of unknown origin 552
